

## Senior Engineer – Facilities & Energy

An exciting opportunity has arisen for a Senior Engineer - Energy & Facilities, to join our Facilities Engineering team. You will be responsible for the management of energy & utility generation and use across two manufacturing sites to enable the development and successful implementation of an industry leading Net Zero 2030 carbon strategy. You will have responsibility for the management of buildings, infrastructure, grounds and utilities ensuring that all site buildings, infrastructure and grounds are compliant with all applicable UK legislation. You will ensure that all energy related external/internal compliance and reporting requirements are met on time. You will also provide technical support to the Engineering division for building / services project work related to new production facility introduction ensuring that compliance is maintained.

### About the Role

- Management of buildings, building services, CO2 reduction and site maintenance resources. Submitting budget to ensure that all buildings and equipment are effectively maintained to manufacturers and regulatory requirements. Recommending & managing budgets for new or improvements to existing buildings, building services, utilities, CO2 reduction, grounds and site infrastructure.
- Management of CO2 reduction activities, compliance reporting to internal and external stakeholders and strategic management objective management including General Manager and Ricoh Family Group reporting.
- Management of building, energy reduction and site services projects. Creating detailed specifications, prepare and maintain schedules. Manage projects to schedule and budget targets and supervise sub-contractors. Ensure all work is completed to the agreed specification and is compliant with statutory regulations.
- Management of building services maintenance contracts. Negotiating annual contracts with purchasing . Ensuring all work is carried out to specification and schedule and complies with statutory regulations.
- Engineering Division Support. Act as Ricoh CDM planning supervisor. Provide, maintain and control building, building services, or grounds and infrastructure drawings.

### About the Person

You will have extensive proven ability in a similar role and substantial experience of, energy management, electrical, mechanical, civil and structural engineering. You must have previous experience of maintenance management and project engineering. You must also have a demonstrable understanding of compliance regimes relating to buildings, utilities, energy and site.

You will hold a degree or equivalent in an engineering discipline and NVQ L4 or equivalent in management. Specialist expert knowledge and qualifications in energy and facilities management is preferred.

### What you can expect in return:

- Salary: £47,148 – £54,220
- Shift Pattern: Standard Days – 37 Hours Per Week (8.15am – 5.00pm Mon – Thu and 8.15am – 12.15pm Fri)
- Holidays: 251 Hours Per Year
- 2x yearly bonuses, Private Medical Insurance, Income Protection and Executive Medical.
